WORK EXPERIENCE

Solinst - Junior Web Developer

January 2023 – Current | Georgetown, ON

- Implemented code versioning on the whole website by using Git, GitHub and SourceTree.
- Applied standardization to files names and folder structure.
- Reworked the deployment of updates on the website by adding a dev environment for revision.
- Automated code deployment by using a GitHub actions script to deploy on the FTP webhost.
- Reviewed incoming pull request code changes to the live website.
- Maintained PHP pages and quote forms.
- Implemented better SEO practices, making it easier to be crawled and indexed by use of correct keywords and tags.
- Used Redokun to translate English pages into Spanish and French.

Vectorface - Junior Software Developer

October 2021 – April 2022 | Ottawa, ON

- Refactored older PHP code to better utilize good coding practices.
- Implemented changes to the internal PHP API and ORM.
- Created unit and functional tests and altered the existing test to keep consistency using Codeception.
- Converted old PHP pages to newer React.js, by changing its design and keeping the same functionality.

Superna - Coop Software Developer

January 2020 – May 2020 | Ottawa, ON

- Implemented a search engine and redesigned the documentation website for a more intuitive use (JavaScript, HTML, CSS, nginx, Solr, jQuery and Nutch).
- Created a friendly, easy to read dashboard for the Backup Reports – (JavaScript, HTML and CSS, jQuery).

Algonquin College Language Institute - Lab monitor
